PACDOG Training Systems

PACDOG systems are a fantastic training tool to assist with training your dog, they allow you to simply and accurately address your dog with an appropriate correction i.e. Vibration/Tone or Stimulus. The dog needs to think that the correction at whatever style or level with your voice command or whistle is you warning him of something “out there” that he needs to avoid, the stimulus is similar to the “Static” you get when you touch a car door all it does is distract the dog from what it is doing such as ignoring your recall, chasing sheep etc. it gets his attention back to you and with lots of praise and attention you can get him to return to you or follow your command. They are designed to give dog’s the freedom they deserve off the lead and have saved hundreds of thousands of dogs lives

Familiarisation with the collar before you start training is essential. It is very important that your dog does not associate the Vibration/Tone or Stimulus with the PACDOG collar. For this purpose we recommend that you familiarise your dog with the collar by fitting the PACDOG Collar on the dog, turned off, for a few hours every day over 10 - 14 days before you enter the active training phase, you can fit the plastic dummy probes included in each kit for this period if preferred. Comes with detailed a training guide on how to train your dog using the PACDOG system.

In order to choose the right dog training collar, there are a few things to consider namely; the size of your dog, his training needs and the range you may need.

We supply dog training collars for Miniature/ Small dogs,
Medium/Large and Extra Large Dogs with up models from 750 meters to 3KM range

Ideal for the all types of persistent problems:

Dogs running away, or being wilfully ‘deaf’ to recall

Jumping up on people or stealing food

Dogs being over-enthusiastic, barking at people or other dogs

Chasing cars, joggers, walkers, cyclists, postmen etc.

Dogs pulling on the lead

Gundogs ‘running’ in or being over-enthusiastic

PACDOG Training Systems 3km Range

PAC EXT2+ Medium/Large Dog Training System

Code: EXT2P1DEXC7-1

Ideal for the all types of persistent problems:

- Dogs running away, or being wilfully 'deaf' to recall
- Jumping up on people or stealing food
- Dogs being over-enthusiastic, barking at people or other dogs
- Chasing cars, joggers, walkers, cyclists, postmen etc.
- Dogs pulling on the lead
- Gundogs 'running' in or being over-enthusiastic
- Chasing farm stock and other animals

- ✓ 3KM Range
- ✓ Includes one collar suitable for Medium/Large Dogs
- ✓ Separate buttons for Tone or Vibration pre-warning and 60 levels of stimulus
- ✓ EXT2+ has 3 programmable buttons set at low, medium and high, if required you can change the stimulus levels appropriate to each dogs needs in advance and save it.
- ✓ The EXT2+ use's standard AAA batteries, handy if out and about and the batteries run out you can simply change them.
- ✓ Collar charges fully in only 2 hours, its lithium-ion battery gives double the Battery Life of any other collar on the market
- ✓ Collar USB Rechargeable – so collar can be charged in the car or jeep if required
- ✓ Collars are waterproof, lightweight, durable & are suitable for long or short haired breeds.
- ✓ Kits come with handy carry case.
- ✓ EXT2+ (standard model) is capable of controlling two dogs from the same handset
(for 2 dogs all that is required is an extra PAC Medium/Large or PAC Miniature Small Dog Collars collars)

PAC EXT6+ Medium/Large Dog Training System

Code: EXT6P1DEXC7

- ✓ 3KM Range
- ✓ Includes one collar suitable for Medium/Large Dogs
- ✓ Separate buttons for Tone or Vibration pre-warning and 60 levels of stimulus
- ✓ EXT6+ has 3 programmable buttons low, medium and high, if required you can change the stimulus levels appropriate to each dogs needs in advance and save it.
- ✓ The EXT6+ use's standard AAA batteries, handy if out and about and the batteries run out you can simply change them.
- ✓ Fast 2 hours Recharging collar, lithium-ion battery giving double the Battery Life of any other collar on the market
- ✓ Collar USB Rechargeable - making it easier to charge in the car or jeep if required
- ✓ Collars are waterproof, lightweight and durable & are suitable for long or short haired breeds
- ✓ Kits come with handy carry case.
- ✓ EXT6+ is capable of controlling up to 6 dogs from the same handset
(for more dogs all that is required are extra PAC Medium/Large or PAC Miniature Small Dog Collars collars)

PACDOG Training Systems up to 1km Range

PAC Mini Miniature/Small Dog Training System

Code: PACMINIKIT

- ✓ Up to 750m Range
- ✓ Suitable for Miniature/Small Dogs, Long or Short Hair Breeds
- ✓ Separate buttons for Tone, Vibration or Stimulus
- ✓ Rotary Dial with 60 levels of stimulus
- ✓ Collar Recharges in Only 2hrs
- ✓ Durable and Waterproof
- ✓ Sync Up to 3 Dogs (extra collars needed)
- ✓ Collar USB Rechargeable making it easier to charge in car or jeep if required

PAC BUZZ Medium/Large Dog Training System

Code: NDXTP1DEXC4B

- ✓ Up to 1km Range
- ✓ Suitable for Medium/Large Dogs, Long or Short Hair Breeds
- ✓ Separate buttons for Tone or Strong Vibration
- ✓ NO STIMULUS
- ✓ Rotary Dial with 60 levels of Strong Vibration
- ✓ Collar Recharges in Only 2hrs

- ✓ Sync Up to 3 Dogs (extra collars needed)
- ✓ Collar USB Rechargeable making it easier to charge in car or jeep if required

PAC nDXT+ Medium/Large Dog Training System

Code: NDXTP1DEXC4

- ✓ Up to 1km Range
- ✓ Suitable for Medium/Large Dogs, Long or Short Hair Breeds
- ✓ Separate buttons for Tone, Vibration or Stimulus
- ✓ Rotary Dial with 60 levels of stimulus
- ✓ Collar Recharges in Only 2hrs
- ✓ Durable and Waterproof
- ✓ Sync Up to 3 Dogs (extra collars needed)
- ✓ Collar USB Rechargeable making it easier to charge in car or jeep if required

So what are differences between the EXT+ & nDXT+ Range?

EXT+ has a much longer range. (1km versus 3km).

EXT+ has programmable stimulus buttons low, medium and high (What's this: you can set the level 0-60 to one that is appropriate for you dog in advance and save it (3 different levels can be saved)

n DXT+ has an adjustable rotary dial making it simple to change on the fly.

EXT+ (Entry level) is capable of having two dogs running of the Controller. With the n DXT+ it is three dogs. (Must point out here that different versions of the EXT+ can have up to 6 dogs)

Both have re-chargeable collars. The n DXT+ handset is also re-chargeable. This can be a plus and a minus. If out and about and the battery runs out you can't change it. The EXT+ use's standard AAA batteries. Both come with a 2 year warranty.

PAC Buzz kits have all the features of the n DXT+ but cannot give a shock. It can only give the dog a pre-warning tone or very strong vibration as a correction to get the dogs attention. PAC Mini has 750m range and is suitable for miniature/small dogs.

- ✓ EXT6+ Standard model is capable of controlling two dogs from the same handset (for 6 dogs all that is required are extra PAC Medium/Large, PAC Miniature Small or Buzz Dog Collars)

PACDOG Pet Fence

The PAC Fence system is the ideal, low-cost, invisible way to contain your pet safely, automatically and humanely within a designated area of your garden or property. It is mostly invisible and avoids the need for an ugly and obstructive boundary fence. Since it provides constant, 24/7 surveillance, you do not have to be around keeping watch at all times. It includes everything required to contain one Miniature-Small or Medium/Large size dog (suitable for long or short haired breeds) with 200 metres of durable boundary wire (enough to cover 1/2 acre) for larger areas more wire can be added. PACDOG supply extra reels of wire in 100 or 200 metre reels, comes with a connection kit to join extra wire if required. It is designed for easy, DIY installation with illustrated, step-by-step Installation Guide

By buying extra, suitable PACDOG collars, any number of dogs/cats may be contained within the area that you have set, which might well include “no-go” areas, such as flower-beds, children’s play areas, fish ponds, water features or swimming pools. The pet collar only activates when they near the boundary, compared to an agricultural electric fence this pet fence has other major advantages: it is safe for children to touch and where a dog or cat can view the wire of an agricultural electric fence and work out whether to jump it or crawl under, they can’t get near the boundary of the PACDOG Pet fence to escape, so driveway gates can be safely left open. The boundary wire can be installed by laying over the ground, buried 2-3 inches down, fed through hose pipe, tacked to an existing fence or through a hedge etc. No expensive battery replacements needed as collar is rechargeable, long operating times up to 3 months.

PACDOG Pet Fence Systems

**PAC Dog Fence
Medium/Large
with 200m Wire**
Code: FC4KIT200

**PAC Pet Fence Miniature,
Small Dog & Cat Kit
with 200m Wire**
Code: PACFENCEMINI200

- The boundary wire can be installed by laying over the ground, buried 2-3 inches down, fed through hose pipe, tacked to an existing fence or through a hedge etc. if fitting it off the ground keep it approx. at the level of your dogs neck from the ground and not much higher.
- There are no restrictions in the shape of the area to be enclosed, which may range from ¼ acre (or less) up to 20+ acres (over 6 acres you would need a boosted PAC control unit and heavier gauge wire)
- All PAC collars have rechargeable batteries, thereby eliminating the frequent purchase of replacement batteries. Initially collar needs to be charged every 2 -3 weeks but once the dog is used to the system it only needs to be charged every 1 – 3 months depending on usage. As a result, running costs are low.
- The PACDOG collar is fully waterproof and will withstand wet, muddy conditions as well as falling into a pond, pool or stream.
- Batteries can be fitted in the Control Unit to keep system running for up to 8 hours if Mains power fails (Batteries not included)
- Very safe wire voltage (12v), powered by normal mains power, or, in areas where Mains is not available or of inferior quality, by using a car or lorry battery.
- As the dog nears the boundary wire the PACDOG collar gives a tone only pre-warning followed by tone & stimulus, the levels of stimulus automatically increase as the dog approaches the wire so no need to manually change levels etc. Once the dog has had the stimulus a few times the tone alone will let him know he is nearing the boundary so he will stay away from it.
- PAC Fence has the highest top end energy transfer to cater for the most determined escape artist. The energy transfer is consistent in all conditions wet, dry or snow.
- Speed detector prevents fast run through, so if dog runs at the wire collar will go straight to maximum level.
- Anti-Linger sensor prevents battery depletion in the tone zone, so if dog sits in the tone zone beep will automatically turn into a stimulus so he can't sit there until he wears out the battery.
- Control unit will alarm if there is a break in the wire.
- Digital signal processing gives immunity from outside radio interference
- In built Power/lightning surge protection.
- If family or friends have the PACDOG system, your collar will automatically work on their system, no extra set up.
- The PAC system is tried and trusted and has been on the market since 1989

PACDOG Bark Controller Collar

Our PACDOG Bark Controller collar is the most humane & highly effective model on the market, designed to give your dog a Vibration or Tone pre warning and distracting static stimulation to stop nuisance barking instantly. You cannot have a dog and expect it to never bark, but nuisance barking now that's a different story.

Nuisance barking is one of the most common dog behaviour problems. A responsible dog owner can stop a dog barking by using our barking collar; it is a proven safe and effective tool to train any dog from barking inappropriately.

The PACDOG Bark Controller comes pre-set with Vibration and correction level 2 as standard, this correction level is similar to the "Static" you get when you touch a car door, it's just above most dog's comfort zone so it distracts the dog to stop excessive barking but if needs be can go up to level 8 for very headstrong dogs. After a few corrections, the dog will realize that the correction is caused by the barking -- the dog will then resist the urge to bark at normal neighbourhood activities. Then in some cases if required it can be set to level "0" which is vibration only. So, owners can plan ahead on how to train their dog in avoiding nuisance barking.

For example, we have customers that put the collar on every night consistently. This will change the dog's behavioural pattern. After a few weeks, they will remove the bark collar and satisfied with the result. Others do a weekly refresher, which is very effective because it will remind the dog about the training. However, some dog owners leave the bark collar on at times when they go out or they know the dog will start the barking. It is all dependent to the dog's drive when it comes to barking. Avoid leaving the PACDOG collar on the dog for over 12 hours per day and wash the dog's neck area weekly

PACDOG Bark Controller Collar

Bark Controller
Code: **ANTIBARKER**

- ✓ Stops persistent, nuisance barking automatically
- ✓ Wearing this collar your dog will learn quickly for himself that barking for barking's sake is not an option
- ✓ Longest battery life on the market, rechargeable lithium-ion battery
- ✓ Charges in two hours and up to two months usage between charging.
- ✓ Automatic, humane & highly effective.
- ✓ Not affected by the barking noises from other companion dogs.
- ✓ Collar can be set at 8 different levels of stimulation.
- ✓ Not only that, but you can choose level "0" to use just the vibrate or tone functions, no stimulation
- ✓ The first warning cycle will be vibration or tone only pre-warning but with persistent barking, the collar will give repeated stimulus (at a pre-selected stimulation level)
- ✓ The stimulation will cease immediately when the barking stops
- ✓ Collar is lightweight, durable and waterproof
